

Headline®

fungicide

Supplemental Labeling

For use in aerial applications to Corn and Soybeans (Spray volumes of 2 or more gallons per acre)

EPA Reg. No. 7969-186

Active Ingredient:*

Pyraclostrobin (carbamic acid, [2-[[[1-(4-chlorophenyl)-1H-pyrazol-3-yl]oxy]methyl]phenyl] methoxy-, methyl ester) 23.6%

Other ingredients:** 76.4%

Total 100.0%

* Equivalent to 2.09 pounds of pyraclostrobin per gallon

** Contains petroleum distillates

Directions For Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling. **DO NOT** apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

Refer to the **Headline® fungicide** main label, EPA Reg. No. 7969-186, for complete directions for use and all applicable restrictions and precautions. User must have the full **Headline** container label and this supplemental in possession at the time of pesticide application.

General Information

Headline provides optimum disease control when applied in a regularly scheduled protective fungicide program and is used in a spray program that rotates fungicides with different modes of action.

Application Information

Aerial Application to Corn and Soybeans:

Aerial applications of **Headline** may be made to corn and soybeans in water volumes of 2 or more gallons of spray solution per acre (gpa). For application volumes of 2 to 5 gpa, the spray solution must contain crop oil with emulsifier properties at a rate of 0.5-1.0 pt/acre. The higher oil rate is recommended when weather conditions become less conducive to spray droplets reaching the target; air temperature >85° F or relative humidity <60%, or when application volume is less than or equal to 3 gpa. For applications of 5 gpa or more use an approved adjuvant at standard rates (example: NIS at 1-2 pints/100 gallons of spray mix (0.125-0.25%v/v)). Select spray nozzles, pumping pressure, and sprayer height to provide medium to fine spray droplets that penetrate throughout the crop canopy. Spray calibration must be

conducted to confirm spray droplet sizes. Continue to monitor spray application (including weather conditions) to assure proper droplet size and canopy penetration. Refer to the main **Headline** label for specific instructions pertaining to **Spray Drift Management, Aerial Application Methods and Equipment,** and applications at or above 5 gallons per acre.

No aerial application in New York State except as permitted under FIFRA Section 24(c), Special Local Needs Registration.

Conditions of Sale and Warranty

The **Directions For Use** of this product reflects the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. All such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the **Directions For Use**, subject to the inherent risks, referred to above.

BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. TO THE EXTENT PERMITTED BY LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing **Conditions of Sale and Warranty** which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
